Notes on tables and figures

General remarks

In Germany, the Gewerbliche Berufsgenossenschaften (BGs) and the Unfallversicherungsträger der öffentlichen Hand (UVTöH) are the institutions for statutory accident insurance and prevention for the industrial (BGs) and public (UVTöH) sector. The Deutsche Gesetzliche Unfallversicherung (German Statutory Accident Insurance, DGUV) was founded by the BGs and UVTöH in 2007 to support their common objectives and to serve their mutual interest.

Since 1969, the former central federation of the BGs, the HVBG, has published annually a booklet under the title “Arbeitsunfallstatistik für die Praxis” containing figures and long-term trends from the BG. The scope of data compiled has been extended several times over this period. Considering this development, the German title of the brochure has been changed to “BG-Statistiken für die Praxis” in 1992. Since 1993, an English translation of the brochure has been published every year, responding to the growing interest shown in these figures abroad. Following the merger into DGUV in 2007, the statistical information of the industrial (BGs) and public (UVTöH) sector were brought together.

The material has been compiled using the many years of experience gained in dealing with requests for statistical data from the BG and the UVTöH. First, the booklet contains information on the number of member companies, hours worked and persons insured. Furthermore, data on reportable and fatal accidents at work (including day care and school) and on the way to and from work as well as new accident pensions are given. A list of all occupational diseases (OD) is included as well as the number of notifications of a suspected case of OD, the recognized OD cases, new OD pensions and a summary of all OD cases a decision was taken on in the year under review. Finally, data on the number of pensions, the apportionment quota required of member companies, the expenditure of the BG and the UVTöH including that for accident prevention, curative treatment and pensions are provided, together with selected information on the BGs and UVTöH work in the field of accident prevention and worker protection.

The time-series normally begins in 1986 when in some areas the statistical basis used in accident insurance has been changed.

Inclusion of the new federal states in eastern Germany

Since January 1, 1991, the BG and UVTöH have also been responsible for the new federal states in eastern Germany. Therefore these have been included in the data since 1991. For that reason it is not possible to make any direct comparison between the figures for these years and figures for previous years. This applies in particular to the frequency of new pensions awarded due to ill health: Pensions are only granted when all attempts have been made to rehabilitate the person concerned; hence in particularly serious cases in which the person is hospitalised for a long time or spends a long time in vocational retraining, a long period may elapse between the accident occurring and compensation being received. In 1991 and 1992, those cases have not been compensated by cases from preceding years, leading to an artificial decrease of new pension rates in these years. Since 1993, the rates are again reflecting the actual risks.

In addition to this, the former GDR law on occupational diseases with its own list of recognized diseases continued to apply in the new federal states until the end of 1991. Even after 1991, cases of occupational disease listed under former GDR law may still be recognized, as long as the insured event took place before January 1, 1992, and notification of the suspected case of the disease was made before the end of 1993.

Introduction of the European Single Currency Euro

Since introduction of the Euro on January 1, 2001, all monetary figures have been reported in Euro. To facilitate a comparison with the previous years, the figures before 2001 have been converted in €, the conversion being based on the factor 1.95583 DM for 1 €.

Merger into Deutsche Gesetzliche Unfallversicherung

On June 1, 2007, the BGs and the UVTöH merged their umbrella associations - the registered associations HVBG and BUK, the former central federation of the UVTöH, - to the Deutsche Gesetzliche Unfallversicherung.

Definition of terms

Berufsgenossenschaften (BGs): Institutions for statutory accident insurance and prevention for the industrial sector.

Unfallversicherungsträger der öffentlichen Hand (UVTöH): Institutions for statutory accident insurance and prevention for the public sector.

Reportable accidents:

- Accidents at work or on the way to or from work (commuting accidents) which are either fatal or lead to an incapacity to work for more than three days.
- Accidents at school¹ or on the way to or from school which are either fatal or lead to medical attention.

New occupational accident pensions / new commuting accident pensions: Accidents at work or commuting accidents for which compensation was paid for the first time in the year under review either in the form of a pension, a lump-sum or a death grant.

Notification of a suspected case of occupational disease:

Any notification of a suspected case of occupational disease received by the BG or UVTöH from insured persons, health insurance funds, companies or other sources, regardless of whether or not the suspicion proves justified.

Recognized occupational diseases:

Of all reports of suspected occupational disease, all those cases in which it has been proved in an adjudication procedure that the person is indeed suffering from the occupational disease. For some diseases, the confirmation of the occupational causation must coincide with additional insurance conditions, e.g. some diseases must have forced the person to refrain from all activities which led or could lead to the development, aggravation or recurrence of the illness. If such conditions are not fulfilled, a formal OD recognition is not possible. Nevertheless, extensive benefits for

prevention, curative treatment and vocational help are often granted in these cases.

New occupational disease pensions: Those cases of recognized occupational disease for which the insurance requirements for compensation in the form of a pension or a death grant were established for the first time in the year under review.

Full time equivalent employees (FTE): Factor used in calculating the incidence of work-related accidents. A full time equivalent employee (FTE) is defined in relation to the average annual number of actual working hours for a full time employee in industry and in services sectors and is therefore a reflection of the period of exposure to the risk of accidents at work.

Insurance relationship: Any relationship between an insurer and an insured person based on legal ordinance, bearing in mind that one person may have multiple insurance relationships; used as a basis for calculating the frequency of commuting accidents since every insured activity also entails the risk of a commuting accident.

Apportionment quota: Surplus of the outgoings of the Berufsgenossenschaften over their incomings which, at the end of the year under review, is divided between the industrial companies.

Contribution quota: Surplus of the outgoings of the public sector accident insurers over their incomings which is shared among the insured municipality and affiliated companies following the budget plan before the year under review.

Compensation: All cash and non-cash benefits to those who have been injured or have become ill or to surviving dependents.

Expenditure on prevention: These are the costs for administration and coordination. The members of the professional associations themselves are obliged by law to carry out accident prevention in their business. No statistics are compiled on their expenditure but it is without doubt many times greater than the expenditure of the professional associations recorded here.

¹ The statutory pupil accident insurance covers all children and adolescents from nursery school through university during their time at school and day care, including their way to and from school.

Table 20a:

Occupational Diseases as contained in the annex to the German ordinance on occupational diseases

No.	Occupational diseases
	1 Diseases caused by chemical agents
	11 Metals and metalloids
1101	Diseases caused by lead or its compounds
1102	Diseases caused by mercury or its compounds
1103	Diseases caused by chromium or its compounds
1104	Diseases caused by cadmium or its compounds
1105	Diseases caused by manganese or its compounds
1106	Diseases caused by thallium or its compounds
1107	Diseases caused by vanadium or its compounds
1108	Diseases caused by arsenic or its compounds
1109	Diseases caused by phosphorus or its inorganic compounds
1110	Diseases caused by beryllium or its compounds
	12 Asphyxiating gases
1201	Diseases caused by carbon monoxide
1202	Diseases caused by hydrogen sulphide
	13 Solvents, pesticides and other chemical agents
1301	Mucosal changes, cancer or other neoplasms of the urinary tract caused by aromatic amines
1302	Diseases caused by halogenated hydrocarbons
1303	Diseases caused by benzene and its homologues or by styrene
1304	Diseases caused by nitro or amino compounds of benzene or its homologues or their derivatives
1305	Diseases caused by carbon disulphide
1306	Diseases caused by methyl alcohol (methanol)
1307	Diseases caused by organic phosphorus compounds
1308	Diseases caused by fluorine or its compounds
1309	Diseases caused by nitric acid esters
1310	Diseases caused by halogenated alkyl oxide, aryl oxide or alkyl aryl oxide
1311	Diseases caused by halogenated alkyl sulphide, aryl sulphide or alkyl aryl sulphide
1312	Dental diseases caused by acids
1313	Lesions to the cornea of the eye caused by benzoquinone
1314	Diseases caused by para-tertiary-butylphenol
1315	Diseases caused by isocyanates ¹
1316	Liver diseases caused by dimethyl formamide
1317	Polyneuropathy or encephalopathy caused by organic solvents or their mixtures
1318	Diseases of blood, blood generating and lymphatic system caused by Benzol ²

¹ see footnote on p. 51

² Since July 1, 2009: added to the annex to the German ordinance on occupational diseases

No.	Occupational diseases
	2 Diseases caused by physical impact
	21 Mechanical impact
2101	Diseases of the tendon sheaths or diseases of the peritendinous tissue or of the insertions of tendons or muscles ¹
2102	Meniscus lesions caused by excessive physical load on the knee joints either sustained or repeated over several years
2103	Diseases caused by vibration during work with pneumatic or similar tools or machines
2104	Circulatory disturbances of the hands caused by vibration ¹
2105	Chronic diseases of the mucous bursae caused by constant pressure
2106	Pressure-induced nerve damage
2107	Strain fracture of the spinous processes
2108	Disc-related diseases of the lumbar spine caused by the lifting or carrying of heavy loads over many years or by performance of work in an extremely bent posture over many years ¹
2109	Disc-related diseases of the cervical spine caused by the carrying of heavy loads on the shoulder over many years ¹
2110	Disc-related diseases of the lumbar spine caused by the predominately vertical impact of whole-body vibration in a seated position over many years ¹
2111	Excessive dental abrasion caused by silica dust exposure over several years
2112	Osteoarthritis of the knee caused by kneeling or comparable knee straining activities with a cumulative exposure period in the whole working life at least of 13,000 hours and a minimum exposure time per shift of 1 hour ²
	22 Compressed air
2201	Diseases caused by work in compressed air
	23 Noise
2301	Hearing impairment caused by noise
	24 Radiation
2401	Cataract caused by heat radiation
2402	Diseases caused by ionizing radiation
	3 Diseases caused by infectious agents or parasites including tropical diseases
3101	Infectious diseases in cases where the insured person worked in health care, welfare or laboratories or was particularly exposed to a similar risk of infection in the context of another activity

¹ see footnote on p. 51

² Since July 1, 2009: added to the annex to the German ordinance on occupational diseases

No.	Occupational diseases
3102	Diseases transmitted to humans by animals
3103	Miner's vermination caused by <i>Ancylostoma duodenale</i> (an- cylostomiasis) or <i>Strongyloides stercoralis</i> (strongyloidiasis)
3104	Tropical diseases, typhus
	4 Diseases of the respiratory tract, lungs, pleura and peri- toneum
	41 Diseases caused by inorganic dust
4101	Silicosis
4102	Silicosis combined with active pulmonary tuberculosis (sili- cotuberculosis)
4103	Asbestosis or diseases of the pleura caused by asbestos dust
4104	Lung or larynx cancer – combined with asbestosis – combined with diseases of the pleura caused by asbestos dust or – if there is evidence of cumulative exposure to asbestos dust in the workplace of at least 25 fibre years { $25 \cdot 10^6$ [(fibre/m ³) * years]}
4105	Mesothelioma of the pleura, the peritoneum or the pericardi- um caused by asbestos
4106	Diseases of the lower respiratory tract and the lungs caused by aluminium or its compounds
4107	Pulmonary fibrosis caused by metallic powder present in the production or processing of hard metals
4108	Diseases of the lower respiratory tract and the lungs caused by dust from basic slag (Thomas phosphate)
4109	Malignant neoplasms of the respiratory tract and the lungs caused by nickel or its compounds
4110	Malignant neoplasms of the respiratory tract and the lungs caused by crude coke oven gas
4111	Chronic obstructive bronchitis or emphysema in under- ground hard coal miners if there is evidence of exposure to a cumulative dose of generally 100 fine dust years [(mg/m ³) * years]
4112	Lung cancer caused by silica dust where there is accompany- ing silicosis or silicotuberculosis
4113	Lung cancer caused by polycyclic aromatic hydrocarbons if there is evidence of exposure to a cumulative dose of gene- rally 100 Benzo[a]pyren years [(µg/m ³) x years] ²

¹ see footnote on p. 51

² Since July 1, 2009: added to the annex to the German ordinance on occupational diseases

No.	Occupational diseases
4114	Lung cancer caused by simultaneous exposure to asbestos fiber dust and polycyclic aromatic hydrocarbons if there is evidence of exposure to a cumulative dose corresponding to a causative probability of at least 50 % according to annex 2 ²
4115	Lung fibrosis caused by extreme and longlasting exposure to welding fumes and gases (Siderofibrosis) ²
	42 Diseases caused by organic dust
4201	Exogenic allergic alveolitis
4202	Diseases of the lower respiratory tract and the lungs caused by raw cotton, raw flax or raw hemp dust (byssinosis)
4203	Adenocarcinoma of the nasal cavities and sinuses caused by beech or oak wood dust
	43 Obstructive diseases of the respiratory tract
4301	Obstructive diseases of the respiratory tract (including rhino- pathy) caused by allergic agents ¹
4302	Obstructive diseases of the respiratory tract caused by che- mical irritants or agents with a toxic effect ¹
	5 Skin diseases
5101	Severe or recurrent skin diseases ¹
5102	Skin cancer or skin alterations showing a cancerous tenden- cy caused by soot, paraffin sludge, tar, anthracene, pitch or similar substances
	6 Diseases caused by other factors
6101	Miner's nystagmus

¹ These diseases must be so severe as to have forced the person to discontinue all activi-
ties that caused or could cause the development, worsening or recurrence of the disease

² Since July 1, 2009: added to the annex to the German ordinance on occupational diseases

Table 20b:

Occupational diseases as contained in the appendix of the former GDR ordinance on occupational diseases

No.	Occupational diseases
	I. Diseases caused by chemical agents
01	Lead and inorganic lead compounds
02	Organic lead compounds
03	Cadmium and cadmium compounds
04	Mercury and inorganic mercury compounds
05	Organic mercury compounds
06	Manganese and manganese compounds
07	Beryllium and beryllium compounds
08	Nickel and nickel compounds
09	Chromium and chromium compounds
10	Arsenic and arsenic compounds (except arsine)
11	Arsine
12	Phosphor and inorganic phosphor compounds
13	Organic phosphor compounds
14	Fluorine and inorganic fluorine compounds
15	Carbon monoxide
16	Hydrogen sulphide
17	Carbon bisulphide
18	Benzene
19	Toluene, xylene
20	Styrene
21	Aliphatic halogenated hydrocarbons (except vinyl chloride)
22	Vinyl chloride
23	Aromatic halogenated hydrocarbons
24	Aromatic nitro compounds and ammonia compounds
25	Methanol
26	Dimethyl formamide
27	Nitric acid ester
28	Benzoquinone
29	Acids
	II. Diseases caused by dust
40	Quarz
41	Asbestos
42	Aluminium
43	Hard metal
44	Thomas slag meal

No.	Occupational diseases
	III. Diseases caused by physical agents
50	Noise
51	Ionising radiation
52	Non-ionising radiation
53	Compressed air
54	Partial body vibration
	IV. Diseases caused by infective agents and parasites
60	Infective agents and parasites which can be transmitted from humans to humans
61	Infective agents and parasites which can be transmitted from animals to humans
62	Infective agents and parasites picked up in the tropics
	V. Diseases caused by continued mechanical strain on the locomotor system
70	Degenerative diseases of the spine
71	Degenerative diseases of the limb joints
72	Conditions of the tendon tissue, the tendon sheath, the tendon chambers, the tendon origins and attachments and the muscle origins and attachments
73	Damage caused by pressure on the peripheral nerves
74	Chronic conditions of the mucous bursa causes by pressure
75	Fatigue fractures of bones
	VI. Diseases caused by various agents
80	Skin diseases caused by chemical and physical agents
81	Irrative chronic diseases of the upper and lower respiratory tracts and lungs caused by chemical substances
82	Allergic diseases of the upper and lower respiratory tracts and lungs caused by vegetable or animal allergens or chemical substances
	VII. Work-related malignant neoplasms
90	Malignant neoplasms of the skin
91	Malignant neoplasms caused by chemical carcinogenics
92	Malignant neoplasms caused by ionising radiation
93	Malignant neoplasms caused by asbestos

Table 21:

Decided cases

	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	Change ¹ from 2009 to 2010	
												absolut	%
Occupational causation confirmed	25,894	25,442	25,942	24,877	24,942	25,022	23,019	23,663	23,028	25,570	31,219	+ 5,649	+ 22.1
of which ■ Recognized cases of occupational disease	18,000	17,950	17,722	16,778	16,784	15,920	14,156	13,383	12,972	16,078	15,461	- 617	- 3.8
