Notes on tables and figures

General remarks

In Germany, the Gewerbliche Berufsgenossenschaften (BGs) and the Unfallversicherungsträger der öffentlichen Hand (UVTöH) are the institutions for statutory accident insurance and prevention for the industrial (BGs) and public (UVTöH) sector. The Deutsche Gesetzliche Unfallversicherung (German Statutory Accident Insurance, DGUV) was founded by the BGs and UVTöH in 2007 to support their common objectives and to serve their mutual interest.

Since 1969, the former central federation of the BGs, the HVBG, has published annually a booklet under the title “Arbeitsunfallstatistik für die Praxis” containing figures and long-term trends from the BG. The scope of data compiled has been extended several times over this period. Considering this development, the German title of the brochure has been changed to “BG-Statistiken für die Praxis” in 1992. Since 1993, an English translation of the brochure has been published every year, responding to the growing interest shown in these figures abroad. Following the merger into DGUV in 2007, the statistical information of the industrial (BGs) and public (UVTöH) sector were brought together.

The material has been compiled using the many years of experience gained in dealing with requests for statistical data from the BG and the UVTöH. First, the booklet contains information on the number of member companies, hours worked and persons insured. Furthermore, data on reportable and fatal accidents at work (including day care and school) and on the way to and from work as well as new accident pensions are given. A list of all occupational diseases (OD) is included as well as the number of notifications of a suspected case of OD, the recognized OD cases, new OD pensions and a summary of all OD cases a decision was taken on in the year under review. Finally, data on the number of pensions, the apportionment quota required of member companies, the expenditure of the BG and the UVTöH including that for accident prevention, curative treatment and pensions are provided, together with selected information on the BGs and UVTöH work in the field of accident prevention and worker protection.

The time-series normally begins in 1986 when in some areas the statistical basis used in accident insurance has been changed.

Inclusion of the new federal states in eastern Germany

Since January 1, 1991, the BG and UVTöH have also been responsible for the new federal states in eastern Germany. Therefore these have been included in the data since 1991. For that reason it is not possible to make any direct comparison between the figures for these years and figures for previous years. This applies in particular to the frequency of new pensions awarded due to ill health: Pensions are only granted when all attempts have been made to rehabilitate the person concerned; hence in particularly serious cases in which the person is hospitalised for a long time or spends a long time in vocational retraining, a long period may elapse between the accident occurring and compensation being received. In 1991 and 1992, those cases have not been compensated by cases from preceding years, leading to an artificial decrease of new pension rates in these years. Since 1993, the rates are again reflecting the actual risks.

In addition to this, the former GDR law on occupational diseases with its own list of recognized diseases continued to apply in the new federal states until the end of 1991. Even after 1991, cases of occupational disease listed under former GDR law may still be recognized, as long as the insured event took place before January 1, 1992, and notification of the suspected case of the disease was made before the end of 1993.

Introduction of the European Single Currency Euro

Since introduction of the Euro on January 1, 2001, all monetary figures have been reported in Euro. To facilitate a comparison with the previous years, the figures before 2001 have been converted in €, the conversion being based on the factor 1.95583 DM for 1 €.

Merger into Deutsche Gesetzliche Unfallversicherung

On June 1, 2007, the BGs and the UVTöH merged their umbrella associations - the registered associations HVBG and BUK, the former central federation of the UVTöH, - to the Deutsche Gesetzliche Unfallversicherung.

Definition of terms

Berufsgenossenschaften (BGs): Institutions for statutory accident insurance and prevention for the industrial sector.

Unfallversicherungsträger der öffentlichen Hand (UVTöH): Institutions for statutory accident insurance and prevention for the public sector.

Reportable accidents:

- Accidents at work or on the way to or from work (commuting accidents) which are either fatal or lead to an incapacity to work for more than three days.
- Accidents at school¹ or on the way to or from school which are either fatal or lead to medical attention.

New occupational accident pensions / new commuting accident pensions: Accidents at work or commuting accidents for which compensation was paid for the first time in the year under review either in the form of a pension, a lump-sum or a death grant.

Notification of a suspected case of occupational disease:

Any notification of a suspected case of occupational disease received by the BG or UVTöH from insured persons, health insurance funds, companies or other sources, regardless of whether or not the suspicion proves justified.

Recognized occupational diseases:

Of all reports of suspected occupational disease, all those cases in which it has been proved in an adjudication procedure that the person is indeed suffering from the occupational disease. For some diseases, the confirmation of the occupational causation must coincide with additional insurance conditions, e.g. some diseases must have forced the person to refrain from all activities which led or could lead to the development, aggravation or recurrence of the illness. If such conditions are not fulfilled, a formal OD recognition is not possible. Nevertheless, extensive benefits for

prevention, curative treatment and vocational help are often granted in these cases.

New occupational disease pensions: Those cases of recognized occupational disease for which the insurance requirements for compensation in the form of a pension or a death grant were established for the first time in the year under review.

Full time equivalent employees (FTE): Factor used in calculating the incidence of work-related accidents. A full time equivalent employee (FTE) is defined in relation to the average annual number of actual working hours for a full time employee in industry and in services sectors and is therefore a reflection of the period of exposure to the risk of accidents at work.

Insurance relationship: Any relationship between an insurer and an insured person based on legal ordinance, bearing in mind that one person may have multiple insurance relationships; used as a basis for calculating the frequency of commuting accidents since every insured activity also entails the risk of a commuting accident.

Apportionment quota: Surplus of the outgoings of the Berufsgenossenschaften over their incomings which, at the end of the year under review, is divided between the industrial companies.

Contribution quota: Surplus of the outgoings of the public sector accident insurers over their incomings which is shared among the insured municipality and affiliated companies following the budget plan before the year under review.

Compensation: All cash and non-cash benefits to those who have been injured or have become ill or to surviving dependents.

Expenditure on prevention: These are the costs for administration and coordination. The members of the professional associations themselves are obliged by law to carry out accident prevention in their business. No statistics are compiled on their expenditure but it is without doubt many times greater than the expenditure of the professional associations recorded here.

¹ The statutory pupil accident insurance covers all children and adolescents from nursery school through university during their time at school and day care, including their way to and from school.

Table 1:

Companies, hours worked and full time equivalent employees

| Year | Companies ¹ | Hours worked in 1,000 | Full time equivalent employees | FTE guideline figure ² |

² Accidents on the way to or from school (including day care) which are either fatal or lead to medical attention.
³ In 2011 some UVtöH have changed the administrative process for the declaration of reportable accidents, so that the numerical value is of limited statistical reliability.

Figure 8:
New workplace and school accident pensions

- * With the introduction of SGB VII (1997), the pension criteria has changed; the minimum time period for limited earning capacity has extended from 13 to 26 weeks until monetary compensation was paid.

Figure 9:
New commuting accident pensions

- * With the introduction of SGB VII (1997), the pension criteria has changed; the minimum time period for limited earning capacity has extended from 13 to 26 weeks until monetary compensation was paid.

Table 20a:

Occupational Diseases as contained in the annex to the German ordinance on occupational diseases

| No. | Occupational diseases |
|------|-----------------------------------------------------------------------------------------------|
| | 1 Diseases caused by chemical agents |
| | 11 Metals and metalloids |
| 1101 | Diseases caused by lead or its compounds |
| 1102 | Diseases caused by mercury or its compounds |
| 1103 | Diseases caused by chromium or its compounds |
| 1104 | Diseases caused by cadmium or its compounds |
| 1105 | Diseases caused by manganese or its compounds |
| 1106 | Diseases caused by thallium or its compounds |
| 1107 | Diseases caused by vanadium or its compounds |
| 1108 | Diseases caused by arsenic or its compounds |
| 1109 | Diseases caused by phosphorus or its inorganic compounds |
| 1110 | Diseases caused by beryllium or its compounds |
| | 12 Asphyxiating gases |
| 1201 | Diseases caused by carbon monoxide |
| 1202 | Diseases caused by hydrogen sulphide |
| | 13 Solvents, pesticides and other chemical agents |
| 1301 | Mucosal changes, cancer or other neoplasms of the urinary tract caused by aromatic amines |
| 1302 | Diseases caused by halogenated hydrocarbons |
| 1303 | Diseases caused by benzene and its homologues or by styrene |
| 1304 | Diseases caused by nitro or amino compounds of benzene or its homologues or their derivatives |
| 1305 | Diseases caused by carbon disulphide |
| 1306 | Diseases caused by methyl alcohol (methanol) |
| 1307 | Diseases caused by organic phosphorus compounds |
| 1308 | Diseases caused by fluorine or its compounds |
| 1309 | Diseases caused by nitric acid esters |
| 1310 | Diseases caused by halogenated alkyl oxide, aryl oxide or alkyl aryl oxide |
| 1311 | Diseases caused by halogenated alkyl sulphide, aryl sulphide or alkyl aryl sulphide |
| 1312 | Dental diseases caused by acids |
| 1313 | Lesions to the cornea of the eye caused by benzoquinone |
| 1314 | Diseases caused by para-tertiary-butylphenol |
| 1315 | Diseases caused by isocyanates ¹ |
| 1316 | Liver diseases caused by dimethyl formamide |
| 1317 | Polyneuropathy or encephalopathy caused by organic solvents or their mixtures |
| 1318 | Diseases of blood, blood generating and lymphatic system caused by Benzol ² |

¹ see footnote on p. 51² Since July 1, 2009: added to the annex to the German ordinance on occupational diseases

| No. | Occupational diseases |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | 2 Diseases caused by physical impact |
| | 21 Mechanical impact |
| 2101 | Diseases of the tendon sheaths or diseases of the peritendinous tissue or of the insertions of tendons or muscles ¹ |
| 2102 | Meniscus lesions caused by excessive physical load on the knee joints either sustained or repeated over several years |
| 2103 | Diseases caused by vibration during work with pneumatic or similar tools or machines |
| 2104 | Circulatory disturbances of the hands caused by vibration ¹ |
| 2105 | Chronic diseases of the mucous bursae caused by constant pressure |
| 2106 | Pressure-induced nerve damage |
| 2107 | Strain fracture of the spinous processes |
| 2108 | Disc-related diseases of the lumbar spine caused by the lifting or carrying of heavy loads over many years or by performance of work in an extremely bent posture over many years ¹ |
| 2109 | Disc-related diseases of the cervical spine caused by the carrying of heavy loads on the shoulder over many years ¹ |
| 2110 | Disc-related diseases of the lumbar spine caused by the predominately vertical impact of whole-body vibration in a seated position over many years ¹ |
| 2111 | Excessive dental abrasion caused by silica dust exposure over several years |
| 2112 | Osteoarthritis of the knee caused by kneeling or comparable knee straining activities with a cumulative exposure period in the whole working life at least of 13,000 hours and a minimum exposure time per shift of 1 hour ² |
| | 22 Compressed air |
| 2201 | Diseases caused by work in compressed air |
| | 23 Noise |
| 2301 | Hearing impairment caused by noise |
| | 24 Radiation |
| 2401 | Cataract caused by heat radiation |
| 2402 | Diseases caused by ionizing radiation |
| | 3 Diseases caused by infectious agents or parasites including tropical diseases |
| 3101 | Infectious diseases in cases where the insured person worked in health care, welfare or laboratories or was particularly exposed to a similar risk of infection in the context of another activity |

¹ see footnote on p. 51² Since July 1, 2009: added to the annex to the German ordinance on occupational diseases

| No. | Occupational diseases |
|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3102 | Diseases transmitted to humans by animals |
| 3103 | Miner's vermination caused by <i>Ancylostoma duodenale</i> (ancylostomiasis) or <i>Strongyloides stercoralis</i> (strongyloidiasis) |
| 3104 | Tropical diseases, typhus |
| | 4 Diseases of the respiratory tract, lungs, pleura and peritoneum |
| | 41 Diseases caused by inorganic dust |
| 4101 | Silicosis |
| 4102 | Silicosis combined with active pulmonary tuberculosis (sili-cotuberculosis) |
| 4103 | Asbestosis or diseases of the pleura caused by asbestos dust |
| 4104 | Lung or larynx cancer <ul style="list-style-type: none"> – combined with asbestosis – combined with diseases of the pleura caused by asbestos dust or – if there is evidence of cumulative exposure to asbestos dust in the workplace of at least 25 fibre years $\{25 \cdot 10^6 [(fibre/m^3) \cdot years]\}$ |
| 4105 | Mesothelioma of the pleura, the peritoneum or the pericardium caused by asbestos |
| 4106 | Diseases of the lower respiratory tract and the lungs caused by aluminium or its compounds |
| 4107 | Pulmonary fibrosis caused by metallic powder present in the production or processing of hard metals |
| 4108 | Diseases of the lower respiratory tract and the lungs caused by dust from basic slag (Thomas phosphate) |
| 4109 | Malignant neoplasms of the respiratory tract and the lungs caused by nickel or its compounds |
| 4110 | Malignant neoplasms of the respiratory tract and the lungs caused by crude coke oven gas |
| 4111 | Chronic obstructive bronchitis or emphysema in underground hard coal miners if there is evidence of exposure to a cumulative dose of generally 100 fine dust years $[(mg/m^3) \cdot years]$ |
| 4112 | Lung cancer caused by silica dust where there is accompanying silicosis or silicotuberculosis |
| 4113 | Lung cancer caused by polycyclic aromatic hydrocarbons if there is evidence of exposure to a cumulative dose of generally 100 Benzo[a]pyren years $[(\mu g/m^3) \cdot years]^2$ |

¹ see footnote on p. 51

² Since July 1, 2009: added to the annex to the German ordinance on occupational diseases

| No. | Occupational diseases |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4114 | Lung cancer caused by simultaneous exposure to asbestos fiber dust and polycyclic aromatic hydrocarbons if there is evidence of exposure to a cumulative dose corresponding to a causative probability of at least 50 % according to annex 2 ² |
| 4115 | Lung fibrosis caused by extreme and longlasting exposure to welding fumes and gases (Siderofibrosis) ² |
| | 42 Diseases caused by organic dust |
| 4201 | Exogenic allergic alveolitis |
| 4202 | Diseases of the lower respiratory tract and the lungs caused by raw cotton, raw flax or raw hemp dust (byssinosis) |
| 4203 | Adenocarcinoma of the nasal cavities and sinuses caused by beech or oak wood dust |
| | 43 Obstructive diseases of the respiratory tract |
| 4301 | Obstructive diseases of the respiratory tract (including rhinopathy) caused by allergic agents ¹ |
| 4302 | Obstructive diseases of the respiratory tract caused by chemical irritants or agents with a toxic effect ¹ |
| | 5 Skin diseases |
| 5101 | Severe or recurrent skin diseases ¹ |
| 5102 | Skin cancer or skin alterations showing a cancerous tendency caused by soot, paraffin sludge, tar, anthracene, pitch or similar substances |
| | 6 Diseases caused by other factors |
| 6101 | Miner's nystagmus |

¹ These diseases must be so severe as to have forced the person to discontinue all activities that caused or could cause the development, worsening or recurrence of the disease

² Since July 1, 2009: added to the annex to the German ordinance on occupational diseases

Table 20b:

Occupational diseases as contained in the appendix of the former GDR ordinance on occupational diseases

| No. | Occupational diseases |
|-----|------------------------------------------------------------|
| | I. Diseases caused by chemical agents |
| 01 | Lead and inorganic lead compounds |
| 02 | Organic lead compounds |
| 03 | Cadmium and cadmium compounds |
| 04 | Mercury and inorganic mercury compounds |
| 05 | Organic mercury compounds |
| 06 | Manganese and manganese compounds |
| 07 | Beryllium and beryllium compounds |
| 08 | Nickel and nickel compounds |
| 09 | Chromium and chromium compounds |
| 10 | Arsenic and arsenic compounds (except arsine) |
| 11 | Arsine |
| 12 | Phosphor and inorganic phosphor compounds |
| 13 | Organic phosphor compounds |
| 14 | Fluorine and inorganic fluorine compounds |
| 15 | Carbon monoxide |
| 16 | Hydrogen sulphide |
| 17 | Carbon bisulphide |
| 18 | Benzene |
| 19 | Toluene, xylene |
| 20 | Styrene |
| 21 | Aliphatic halogenated hydrocarbons (except vinyl chloride) |
| 22 | Vinyl chloride |
| 23 | Aromatic halogenated hydrocarbons |
| 24 | Aromatic nitro compounds and ammonia compounds |
| 25 | Methanol |
| 26 | Dimethyl formamide |
| 27 | Nitric acid ester |
| 28 | Benzoquinone |
| 29 | Acids |
| | II. Diseases caused by dust |
| 40 | Quarz |
| 41 | Asbestos |
| 42 | Aluminium |
| 43 | Hard metal |
| 44 | Thomas slag meal |

| No. | Occupational diseases |
|-----|----------------------------------------------------------------------------------------------------------------------------------------------------|
| | III. Diseases caused by physical agents |
| 50 | Noise |
| 51 | Ionising radiation |
| 52 | Non-ionising radiation |
| 53 | Compressed air |
| 54 | Partial body vibration |
| | IV. Diseases caused by infective agents and parasites |
| 60 | Infective agents and parasites which can be transmitted from humans to humans |
| 61 | Infective agents and parasites which can be transmitted from animals to humans |
| 62 | Infective agents and parasites picked up in the tropics |
| | V. Diseases caused by continued mechanical strain on the locomotor system |
| 70 | Degenerative diseases of the spine |
| 71 | Degenerative diseases of the limb joints |
| 72 | Conditions of the tendon tissue, the tendon sheath, the tendon chambers, the tendon origins and attachments and the muscle origins and attachments |
| 73 | Damage caused by pressure on the peripheral nerves |
| 74 | Chronic conditions of the mucous bursa causes by pressure |
| 75 | Fatigue fractures of bones |
| | VI. Diseases caused by various agents |
| 80 | Skin diseases caused by chemical and physical agents |
| 81 | Irritative chronic diseases of the upper and lower respiratory tracts and lungs caused by chemical substances |
| 82 | Allergic diseases of the upper and lower respiratory tracts and lungs caused by vegetable or animal allergens or chemical substances |
| | VII. Work-related malignant neoplasms |
| 90 | Malignant neoplasms of the skin |
| 91 | Malignant neoplasms caused by chemical carcinogenics |
| 92 | Malignant neoplasms caused by ionising radiation |
| 93 | Malignant neoplasms caused by asbestos |

Table 21:

Decided cases

| | | | | | | | | | | | | Change from 2011 to 2012 | |
|-----------------------------------------------------------------------------------------|---------------|---------------|---------------|---------------|---------------|---------------|---------------|---------------|---------------|---------------|---------------|-----------------------------|--------------|
| | 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 | absolut | % |
| Occupational causation confirmed | 25,942 | 24,877 | 24,942 | 25,022 | 23,019 | 23,663 | 23,028 | 25,570 | 31,219 | 34,573 | 35,293 | + 720 | + 2.1 |
| of which ■ Recognized cases of occupational ¹ disease | 17,722 | 16,778 | 16,784 | 15,920 | 14,156 | 13,383 | 12,972 | 16,078 | 15,461 | 15,262 | 15,291 | + 29 | + 0.2 |
| <i>of which: new pensions¹</i> | 5,443 | 5,085 | 5,021 | 5,459 | 4,781 | 4,123 | 4,312 | 6,643 | 6,123 | 5,407 | 4,924 | - 483 | - 8.9 |
| ■ Cases with absence of additionally required insurance characteristics ² | 8,220 | 8,099 | 8,158 | 9,102 | 8,863 | 10,280 | 10,056 | 9,492 | 15,758 | 19,311 | 20,002 | + 691 | + 3.6 |
| Occupational causation not confirmed | 44,707 | 43,575 | 41,374 | 38,887 | 38,040 | 35,980 | 36,440 | 37,132 | 37,967 | 37,165 | 36,096 | - 1,069 | - 2.9 |
| Total number of decided cases | 70,649 | 68,452 | 66,316 | 63,909 | 61,059 | 59,643 | 59,468 | 62,702 | 69,186 | 71,738 | 71,389 | - 349 | - 0.5 |

¹ The omission of the retroactive effect clause (verdict of the Federal Social Court, 2008-12-02) caused a recognition of old cases (OD 4111). Simultaneously, the revised recommendation for medical expertise of slight silicosis (OD 4101) resulted in an increase in the number of cases. At the present time the impact of these changes comes to an end.

² The reason for the increase is the improvement of the documentation § 3 of the German Ordinance on Occupational Diseases step 1 of the phased procedure "skin".

Table 22:

**Occupational diseases (OD) in 2012 by subgroups of diseases;
summary**

| Group | Sub-Group | Disease | Notifications of a suspected case of OD | Fatalities due to OD | Decided cases | | | | | |

¹ The omission of the retroactive effect clause (verdict of the Federal Social Court, 2008-12-02) caused a recognition of old cases (OD 4111). Simultaneously, the revised recommendation for medical expertise of slight silicosis (OD 4101) resulted in an increase in the number of cases. At the present time the impact of these changes comes to an end.
