

DGUV Test Information

Date of Issue: 09/2023

Comparison of the CE Mark and Certification Marks

Name	CE mark	GS mark	DGUV Test mark
			
Introduced	1993	1977	1984 (until 06/2010 – BG mark)
Use of the mark	Obligatory if the product is covered by an EU legislation requiring a CE mark	Voluntary certification mark	Voluntary certification mark
Basic Statement	Manufacturer's declaration that the product complies with the requirements of the EU legislation that calls for a CE mark (e.g., safety requirements but also environmental, EMC or performance requirements)	Confirmation by an independent body (GS body) that the product complies with the safety and health regulations	Confirmation by a DGUV Test testing and certification body that the product meets the specified safety and health requirements
Legal basis	European legislation and transposition thereof into national law	German Product Safety Act (ProdSG)	Agreement between manufacturer and DGUV Test testing and certification body
Product categories	Variety of industrial products	Ready-to-use products	Work equipment Additionally, certification of specific aspects.
Awarding procedure	The manufacturer is responsible for affixing the CE mark.	An authorised GS body awards the GS mark.	The DGUV Test mark is awarded by one of the DGUV Test testing and certification bodies.

Name	CE mark	GS mark	DGUV Test mark
Testing and certification required by an independent body?	Generally, not required. Type testing and certification is only compulsory if specified in an EU directive for the product. The CE mark does not indicate whether the product has been type tested by an independent body.	Yes. A certificate based on a type testing is required to obtain the GS mark.	Yes. A certificate based on a type testing is required to obtain the DGUV Test mark.
Monitoring required by an independent body?	Generally, not required. Monitoring is only required if specified in the EU directive. Monitoring is, e.g., specified for PPE category III, but not for machinery according to the Machinery Directive 2006/42/EC.	Yes. The testing and certification body uses monitoring measures to ensure that only products which correspond to the type tested is placed on the market. An initial factory inspection is carried out before the mark is granted.	Yes. The DGUV Test testing and certification body uses monitoring measures to ensure that only equipment which corresponds to the tested type is placed on the market.
Instances of misuse published?	Possibly published in the market surveillance authorities' database (http://www.icsms.org)	Misuse of the GS mark is published by the GS body.	Misuse of the DGUV Test mark is published by DGUV Test ("Schwarze Liste" , in German language only)
Period of validity	The validity of a certificate that a notified body is required to issue depends on the legislation relating to the product in question. For instance, EU type certificates issued for products governed by the Machinery Directive are valid for a maximum of five years.	The certificate is valid for max. 5 years.	The certificate is valid for max. 5 years.

Fig. 1: Test marks from independent testing and certification bodies such as those in the DGUV Test confirm certain product properties. The GS mark and the DGUV Test mark certify that the requirements for safety and health protection requirements are met.

DGUV Test – extensive expertise in product safety

Our customers benefit directly from our decades of experience in safety testing during and after the design phase. Voluntary tests and certification help manufacturers, importers, and dealers to meet the requirements of the EU legislation and the German Product Safety Act and to avoid product liability issues.

A list of our testing and certification bodies can be found here: www.dguv.de › web code e24697.
